402 pages - 375 illustrations.

Includes caths, surgeries, echo, electrophysiology, more.

ADULT Congenital Heart Disease

"comprehensive, concise...a gem of a book"

This book will change the way you look at adult congenital heart disease.

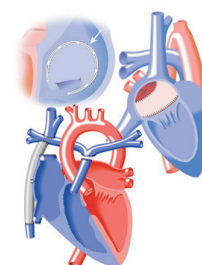

Available in both pocket-size and large format

PedHeart Resource

www.HeartPassport.com

The new **PedHeart Resource** turns any browser into a multi-level teaching tool for patients and staff. The Resource includes detailed defect and treatment descriptions, in-depth tutorials, a searchable image library, numerous patient handouts, and over 1,200 PowerPoint slides in 7 languages. It is an indispensable collection, now available exclusively online.

PedHeart Community Web

The most trusted, most complete, most visited website for patients and families

Community Web is patient-oriented, fully illustrated, and covers all major congenital defects. Information on tests, procedures, adult concerns, nutrition, health, exercise, and pregnancy is easily accessible. Complex procedures are made clear with hundreds of illustrations and vivid animations. Ideal for your patients and families, **Community Web** provides outreach in both English and Spanish to your community and fulfills your hospital's JCAHO responsibilities. Trusted for 16 years as www.pted.org, now you can choose the logo, color scheme and web links to match your hospital website.

PedHeart Encyclopedia

Angio, Echo, ECG, Heart Sounds, X-Ray, and Anatomy

The **Encyclopedia** is a clinical image database that includes more than one thousand images and over 200 full motion videos. Designed to educate students and medical professionals, this software is a terrific resource for all practitioners caring for children or adults with congenital heart disease.
